AutoCAD was a revolutionary development in CAD software, and one of the first to use point-and-click interface and the concept of reusable objects. AutoCAD, which has since been widely adopted by other CAD programs, was the leading commercial desktop 2D CAD program for the next 30 years. It was estimated that AutoCAD was used by 80% of the world's CAD designers in the late 1990s. In 2007, Autodesk discontinued development of AutoCAD Classic, as part of their plan to focus on three applications: AutoCAD, Building Information Modeling (BIM), and construction-based BIM software called Civil 3D. What is AutoCAD? In January 2007, Autodesk released AutoCAD 360, an evolution of AutoCAD to work on the Web. AutoCAD 360 is made up of a software download plus a free online subscription to Autodesk 360. Autodesk 360 is a cloud-based application service designed to replace the functionality of AutoCAD. The AutoCAD 360 subscription includes access to: The customer's AutoCAD drawings, along with AutoCAD's AutoLISP programming language; AutoCAD's Web 2D (2D) and Web 3D (3D) web-based drawing features, including Live Link; a Web browser-based drawing and presentation workspace, including plotting tools and animation capabilities; online documentation and collaboration tools; and AutoCAD's standard drawing and 2D/3D drawing templates. Drawings can be used on any compatible device, and are stored and managed in Autodesk 360. Drawings can be delivered and distributed as both protected and unsecure files, and can be managed by Autodesk 360. With AutoCAD 360, the drawings on the AutoCAD 360 Web site are optimized for faster display on a wide range of devices, including mobile devices. The drawings can be displayed using any browser, and they can be edited online using a drawing workspace, with online help available. Blaine's 4th of July Parade Blaine's 4th of July Parade is a series of parades held every year in Blaine, Minnesota, United States. The first parade was held in 1922, after World War I, when soldiers returning home from the war were honored. The parade is considered to be among the first of its kind. History Blaine's 4th of July Parade has been held annually in the city of Blaine since 1922. The parade has undergone several different formats since its inception. From the original parade to the current (28th), Blaine's parade has been held every year except for World War II, 1969, and the 1975 parade. Blaine's parade has not been held in May or November because these months are usually considered by parade organizers as "peak" months for attendance. As an outgrowth of the 4th of July celebration, it was not uncommon for Blaine's parade to attract hundreds of thousands of spectators. Blaine's 4th of July Parade is considered one of the largest and longest running holiday parades in Minnesota. The parade in 2014 is expected to attract more than 100,000 spectators. Parade format The parade now starts at 10 a.m. on Hwy. 10, three blocks north of the corner of Market and Blaine Ave. and goes west on Hwy. 10 and continues to the parade start/finish line at the intersection of Blaine Ave. and South Mall Drive. The parade will return to Hwy. 10 at the sign for the First National Bank Plaza and continue west to the parade start/finish line. The main course will head north from the finish line to the auditorium. Chaplin's music and entertainment start at 9:45 a.m. with the main course of parade starting at 10 a.m. In prior years, the parade had a very strict dress code. In 2016, a shorter-sleeved shirt and collar was the only required attire. The Blaine Area High School Band and Color Guard will lead the parade in 2016 and will also lead the parade in every 4th of July Parade. The Blaine High School Drumline will also be in the parade and will also be in every 4th of July Parade. The parade will be followed by a carnival and fireworks. ## What's New in the?

Rendered images show up on the screen at design time. While you work on a drawing, you can view and annotate images, such as a 2D or 3D perspective view. (video: 1:40 min.) How do we map 3D objects into 2D space? AutoCAD 2023's new Live Trace feature. Now you can trace, fill in, and animate 3D objects in 2D space. Also, you can save the 3D model for future reference. (video: 1:35 min.) AutoCAD now has the ability to automatically extend lines and splines to follow the surface of a 3D object. When you import a 3D model, lines and splines automatically follow the surface of 3D objects. (video: 1:28 min.) Simplified 3D modeling with variable and advanced capabilities. AutoCAD now lets you work on both modeling and drafting at the same time, without having to choose between the two. (video: 1:20 min.) New 3D option: Face Orientation. AutoCAD now includes a new 3D option, Face Orientation, that lets you change the orientation of faces, edges, and intersections. This is done by moving the face, edge, or intersection on a 3D model. (video: 1:15 min.) Introducing the new Measure tool. AutoCAD's new Measure tool gives you precise control and flexibility for creating and editing 2D objects. (video: 1:27 min.) Quickly create bar charts and pie charts from data in your drawing. You can choose the layout of the chart, style the chart, and export the chart to PDF. (video: 1:28 min.) AutoCAD now includes the ability to rotate objects around the Z-axis. This lets you adjust multiple objects to the same plane. For example, you can create an exact mirror image of an object. (video: 1:21 min.) Can you measure in 3D? With the new Measure tool, you can now create precisely measured, 3D objects. Create an object and add it to the drawing. The new Measure tool allows you to easily create 3D objects with measurements taken directly from your screen. (video: 1:26 min.) Navigating complex 3D models: You can view and edit objects in 3D by using a sliding
